

SUN PROTECTION POLICY

Policy Number: G-1-06-2008

Version No: 5

Responsible Person: BoG Chair

Approved by BoG on: 21-10-2021

Scheduled Review Date: 09-2022

Mandatory – Quality Area 2

Purpose

This policy will provide:

- guidelines to ensure children, staff, volunteers and others participating in Hampton Park Community House programs and activities are well protected from overexposure to ultraviolet (UV) radiation from the sun
- information for parents/guardians, staff, volunteers and children attending Hampton Park Community House regarding sun protection.

Policy Statement

1. VALUES

Hampton Park Community House is committed to:

- promoting sun protection strategies for children, families, staff and visitors to minimise the harmful effects of over exposure to the sun's UV radiation
- ensuring that curriculum planning will minimise over exposure to the sun's UV radiation and also promote an awareness of sun protection and sun safe strategies
- providing information to children, staff, volunteers, parents/guardians and others at the service about the harmful effects of exposure to the sun's UV radiation.

2. SCOPE

This policy applies to the Approved Provider, Person with Management or Control, Nominated Supervisor, Person in day to day Charge, educators, staff, students, volunteers, parents/guardians, children and others attending the programs and activities of Hampton Park Community House.

This policy will apply whenever the sun's UV levels reach three or higher. Whenever this occurs a

combination of sun protection measures are to be used for all outdoor activities.

In Victoria UV levels are usually three or higher from mid-August to the end of April. Please check the daily local sun protection times (refer to *Definitions*) to be sure you are using sun protection when it is required. Active outdoor play is encouraged throughout the day all year, provided appropriate sun protection measures are used when necessary.

3. BACKGROUND AND LEGISLATION

Background

Over exposure to the sun's UV radiation can cause sunburn, skin and eye damage and skin cancer. Australia has one of the highest rates of skin cancer in the world.

Children up to four years of age are particularly vulnerable to UV damage due to lower levels of melanin and a thinner stratum corneum (the outermost layer of skin). UV damage accumulated during childhood and adolescence is associated with an increased risk of skin cancer later in life.

A combination of sun protection measures (hats, clothing, sunscreen, shade and sunglasses) is recommended whenever UV levels are three or higher during daily sun protection times (refer to *Definitions*).

It is a requirement under the Occupational Health and Safety Act 2004 that employers provide a healthy and safe environment for all persons who access the service's facilities and/or programs.

Legislation that governs the operation of approved children's services is based on the health, safety and welfare of the children and requires that children are protected from hazards and harm.

Legislation and standards

Relevant legislation and standards include but are not limited to:

Child Wellbeing and Safety Act 2005 (Vic) (Part 2: Principles for Children)

Education and Care Services National Law Act 2010: Section 167

Education and Care Services National Regulations 2011: including Regulations 100, 101, 113, 114, 168(2)(a)(ii)

National Quality Standard, Quality Area 2: Children's Health and Safety

- Standard 2.3: Each child is protected
- Element 2.3.2: Every reasonable precaution is taken to protect children from harm and any hazard likely to cause injury

Occupational Health and Safety Act 2004

4. DEFINITIONS

The terms defined in this section relate specifically to this policy. For commonly used terms e.g. Approved Provider, Nominated Supervisor, Regulatory Authority etc. refer to the *General Definitions* section of this manual.

Clothing for sun protection: Clothing that is loose-fitting, made from cool, densely woven fabric and covers as much skin as possible: tops with elbow-length sleeves and, if possible, collars and knee-length or longer shorts and skirts. Singlet tops and shoestring tops/dresses do not provide adequate protection in the sun.

Daily sun protection times: Times when it is estimated that the sun's UV radiation will be three or higher. Daily record of UV index and decide on outdoor play depend on the UV index taking all the precautions as sun screens, Hat mandatory. Information about the daily sun protection times is available in the weather section of the daily newspaper, on the SunSmart website at: www.sunsmart.com.au, at myuv.com.au, as a free SunSmart app and as a free widget that can be added to websites.

Shade: An area sheltered from direct and indirect sun, such as a large tree, canopy, verandah or artificial cover. Shade can be built, natural or temporary and can reduce overall exposure to the sun's UV by 75%. When combined with appropriate clothing, hats and sunscreen, children can be well protected from UV overexposure when outdoors. Research shows that preschool environments with trees, shrubbery, and broken ground not only provides better sun protection in outdoor play but also triggers more physical activity.

Sunhat: SunSmart recommends broad-brimmed, legionnaire or bucket-style hats that shade the face, neck and ears. Baseball caps and visors offer little protection to the cheeks, ears and neck, and are not recommended.

Sunglasses: Sunglasses are optional. If worn, it is recommended that glasses are a close fitting, wrap-around style that meet the Australian Standard 1067 (Sunglasses: Category 2, 3 or 4) and cover as much of the eye area as possible. Wearing a hat with a brim that shades the eyes can also reduce UV radiation to the eyes by 50%.

Sunscreen: SPF 50 (or higher) broad-spectrum, water-resistant sunscreen. Sunscreen should be reapplied every two hours, even when labelled 4 hours water resistance. Monitor the expiry date and store in a cool, dry place. From 3 years of age, children are encouraged to apply their own sunscreen under supervision of staff to help develop independent skills ready for school.

SunSmart: The name of the program conducted by Cancer Council to help prevent skin cancer: www.sunsmart.com.au

Evaluation

In order to assess whether the values and purposes of the policy have been achieved, the Approved Provider and Person with Management or Control will:

- regularly seek feedback from educators, staff, parents/guardians, children, management and all affected by the policy regarding its effectiveness
- monitor the implementation, compliance, complaints and incidents in relation to this policy
- keep the policy up to date with current legislation, research, policy and best practice
- revise the policy and procedures as part of the service's policy review cycle, or as required notify parents/guardians at least 14 days before making any change to this policy or its procedures.
